WITHOUT A335R4YE2E34H6	– N/A –
WITHOUT A1NBQ61Y6KO3O9	– N/A –

Average Agreement per Speech: 0.310

Fleiss Kappa per Speech

Observation	Implication
High number of low Kappa scores	Many annotations were ambiguous or subjective. You may want to revisit annotation guidelines or training.
Long tail into high Kappas	Some items were very clear — these can serve as anchor examples or be used to calibrate annotator reliability .
Dip in the middle (0.3–0.6)	Speeches tend to polarize into clear vs. unclear — consider reviewing category definitions or refining edge cases.
